

In 1926 Robert Goddard launched the world's first liquid-fuelled rocket.  
Celebrate the 90th anniversary with a new presentation from  
space expert, broadcaster and author **Jerry Stone FBIS**

# "Nell, Esther and Aunt Effie"

The story of the world's first liquid-fuelled rocket

Within the space of 90 years we went from the first liquid-fuelled rocket to flying past Pluto!

Find out how the whole adventure started in this new presentation from "one of the leading speakers on space exploration":
